

Regulation 15 of the Kiwifruit Export Regulations 1999.

2014-2015 Season Collaborative Marketing

Regulation 15 of the above Regulations requires Kiwifruit New Zealand, within 3 months after the end of each season, to publicly disclose for that season:

- (a) The identity of each person approved by the Board to be a collaborative marketing approval holder; and
- (b) The volume of kiwifruit marketed by each collaborative marketing approval holder; and
- (c) Financial information to enable an assessment to be made as to whether the net returns to suppliers in respect of each collaborative marketing arrangement were greater than would have been the case if the collaborative marketing arrangement had not been approved, including the methodology used by Zespri to allocate costs to the collaborative marketing approval holder.¹

The results for each collaborative marketing arrangement are set out in Table 1 below.

Table 1: Performance of each collaborative marketing arrangement relative to Zespri²

¹ Regulation 15(c) requires an assessment to be made as to whether the net returns to suppliers in respect of each collaborative marketing arrangement were greater than would have been the case if the collaborative marketing arrangement had not been approved, that is a comparison of the arrangement with the next best alternative. Currently available information limits the comparison to benchmarking against the Zespri benchmark (actual average Zespri return) as available for the comparative market or alternatively the comparative geographical region.

² As at 29 June 2015.

Collaborative marketer	Arrangement	Fruit type ³	Volume (trays)	Net incremental OGR over Zespri NZ \$	Weighted index to Zespri
First Fresh NZ Ltd;	Vietnam	Class 1 Gold	15,192	52,404	154.4%
Splice Fruit Ltd;	Austria	Class 1 Organic	138,037	339,891	143.5%
Bidvest New Zealand Ltd;	Pacific Islands	Class 1 Gold	277	661	136.7%

Turners & Growers Ltd;	USA	Class 1 Gold	38,467	-110,936	64.3%
Total			1,630,448	548,220	

Note: Each arrangement is discrete and benchmarked against the closest available comparable Zespri market or geographical area by fruit type. The results cannot be reliably compared to each other because of the differing circumstances of each market. The fruit type classification used above is based on that used by Zespri, and may be used to describe more than a single cultivar. For example, Gold Class 1 is used to categorise all four class 1 gold cultivars.

Financial analysis methodology

³ The Fruit type classification is based on those used by Zespri. There may be one or more cultivars involved in each classification.

The Collaborative Marketer's net return to suppliers is calculated as far as possible in a consistent manner with Zespri returns, as follows:

- Each Collaborative Marketer arrangement is compared to the Zespri return of the closest comparable market or geographical region, by fruit type. The Zespri benchmark return is adjusted to match the fruit sizes and pack type of the collaborative marketing arrangement.
- Revenues and costs (net sales, freight and insurance, direct costs, market selling costs, and Collaborative Marketer commission), and exchange rates used in the calculation of return are those advised by the Collaborative Marketer.
- Costs of supply for Zespri supplied kiwifruit are calculated on the same basis as if the supply was to Zespri, plus certain differential costs for administration, and onshore costs directly associated with the arrangement, called Service Level Agreement costs. Onshore direct costs (fruit labels, pallet cards, export documentation etc) are allocated as applicable at the cost of supply, at a separate rate for each fruit type. Other onshore costs are calculated from information provided by Zespri, adjusted for the pack type as applicable to each collaborative marketing arrangement. Service Level Agreement costs are the specific additional supplier and packhouse costs incurred for handling collaborative marketing packs, at agreed cost by Collaborative Marketing arrangement. For Zespri managed collaborative marketing programmes, the standard Zespri commission rates apply.
- Where kiwifruit is other than from Zespri supply, onshore supply costs are as advised by the collaborative marketer.
- All revenues and costs are converted to New Zealand dollars.

Net Return Indexed to Weighted Zespri Return

The net return to New Zealand suppliers is indexed against a weighted Zespri return - calculated using the methodology outlined above.

- The average Zespri return for the closest comparable market or geographical area is calculated as a benchmark, and is used as the comparable return to suppliers for the fruit if Zespri had sold it.
- The return under each collaborative marketing arrangement is indexed against the comparable weighted Zespri return to suppliers.

Interpreting the Index:

- An index figure of **100.0** means that the net return to suppliers from the collaborative marketing arrangement was **the same as** comparable Zespri returns in the closest comparable market or geographical area.
- An index figure of **less than 100** means that the net return from the collaborative marketing arrangement was **less than** comparable Zespri returns in the same market or geographical area.

- An index figure of **more than 100** means that the net return from the collaborative marketing arrangement was **more than** comparable Zespri returns in the same market or geographical area.

Total fruit and service payment returns to suppliers per tray since 2000 to 2014 season inclusive, and estimated Orchard Gate Return for the 2013 to 2014 season inclusive are as follows:

Season	Compared to Zespri	CM per TE TFSP	Zespri per TE TFSP
2000	\$142,464	\$5.26	\$5.13
2001	-\$1,371,226	\$5.32	\$6.06
2002	\$684,615	\$6.48	\$6.07
2003	\$738,349	\$7.56	\$7.10
2004	\$19,297	\$5.57	\$5.56
2005	-\$55,660	\$4.79	\$4.82
2006	\$202,485	\$6.85	\$6.71
2007	\$607,907	\$6.27	\$5.90
2008	\$392,174	\$7.01	\$6.80
2009	\$682,789	\$6.79	\$6.39
2010	\$858,560	\$6.82	\$6.48
2011	-\$597,545	\$6.21	\$6.38
2012	-\$547,850	\$6.71	\$6.94
2013	285,891	\$7.78	\$7.62
2014-15 (year ended 31 March 2015)	808,983	\$8.76	\$8.26
Total:	2,851,233		
Season	Compared to Zespri	CM per TE OGR	Zespri per TE OGR
2012	-\$341,222	\$3.85	\$3.99
2013	\$279,834	\$4.89	\$4.73
2014-15 (year ended 31 March 2015)	\$548,220	\$5.70	\$5.36

The above table sets out:

1. By year, the total amount by which the collaborative marketing programmes exceeded or fell short of the comparative Zespri returns (measured at OGR).
2. For the 2014-15 season, the average OGR per tray (orchard gate return) for all collaborative marketing arrangements was NZ\$5.70 per tray, and the average equivalent Zespri OGR return Zespri equivalent was NZ\$5.36 per tray;
3. The total amount by which collaborative marketing programmes have exceeded comparative Zespri TFSP for the 13 years up to and including the 2014-15 season is

NZ\$2,851,233.

Table 2: Approval holder and tray allocation for KiwiBerry (Arguta) for all export markets excluding Australia.

The kiwiberry collaborative marketing programmes operate from February to early April in each year. The below results are for February to April 2015, and appear in alphabetical order. The assessment does not include Zespri, as it did not export kiwiberry in 2015.

Collaborative marketing arrangements 2015 Season	Volume marketed t/e⁴	Net Return Per Tray
Delica Limited	15,913	\$28.23
Freshmax NZ Limited	23,525	\$26.42
Fresh Produce Group NZ Limited	14,505	\$26.39
NZ Gourmet Holdings Limited	7,735	\$29.46
Produce Partners NZ Limited	5,716	\$27.03
Seeka Kiwifruit industries Ltd	2,184	\$25.90
Southern Produce Limited	2,544	\$25.13
TOTAL (average)	72,122	\$27.12

Kiwifruit New Zealand
29 June 2015

** Please note the export period for kiwiberry has been corrected and clarified as at 18 March 2022*

⁴ Exports, excluding exports for consumption in Australia
