

2022-2023 Collaborative Marketing Disclosure

Regulation 15 of the Kiwifruit Export Regulations 1999

In accordance with regulation 15 of the Kiwifruit Export Regulations 1999, Kiwifruit New Zealand must, within three months after the end of each season, publicly disclose for that season -

- (a) the identity of each person approved by the Board to be a collaborative marketing approval holder; and
- (b) the volume of kiwifruit marketed by each collaborative marketing approval holder; and
- (c) financial information to enable an assessment to be made as to whether the net returns to suppliers in respect of each collaborative marketing arrangement were greater than would have been the case if the collaborative marketing arrangement had not been approved, including the methodology used by Zespri to allocate costs to the collaborative marketing approval holder.

Notes:

- 1 Season is defined in the Kiwifruit Export Regulations 1999 as a period of 12 months commencing on 1 April in any year and ending with 31 March the following year.
- 2 A comparative assessment has been undertaken in relation to the actual growing/export year which largely overlaps with "season." This assessment therefore uses the volumes marketed under the collaborative marketing arrangement in the 2022-23 growing/export year

Financial analysis methodology

To enable an assessment to be made of the net returns to suppliers from each collaborative marketing arrangement, and whether the returns were greater than would have been the case if the collaborative marketing arrangement had not been approved, KNZ applies the following methodology;

- The net return of each collaborative marketing arrangement is calculated back to orchard gate return (OGR) in NZ dollars. The following financial information, where applicable, is included:
 - The collaborative marketer's revenues and costs (for example, net sales, freight and insurance, direct costs, market selling costs, commission rates and exchange rates) as advised by the collaborative marketer.
 - Where kiwifruit is supplied by Zespri, the costs of supplying each arrangement are as advised by Zespri to KNZ and the Collaborative Marketer. The costs allocated by Zespri are in accordance with the annual Supply Agreement and any specific Service Level Agreements applicable to the individual collaborative marketing arrangement.
 - Where kiwifruit is not from Zespri supply, onshore supply costs are as advised by the collaborative marketer.
- Where financial information is available, and KNZ is of the view it is appropriate, the benchmark returns (OGR) may be adjusted by KNZ to take other relevant factors into account, such as fruit sizes and timing of sales.
- A purposive approach is taken to the assessment recognising that information relating to the actual growing/export year (rather than a strict application of "season" which is 1 April to 31 March) allows for a more useful and reliable comparative assessment.

Net Return Indexed to Benchmark Return

The net return to New Zealand suppliers is indexed against a benchmark OGR return - calculated using the methodology outlined above.

- The average Zespri return for the closest comparable market or geographical area is calculated as a benchmark. The benchmark is used to assess what the return to suppliers would have been if the collaborative marketing arrangement had not been approved.
- If there is no comparable market, the collaborative marketing returns are benchmarked against a likely alternative market that the fruit could have been exported to, if the collaborative marketing arrangement had not been approved.

- Where there is no alternative market, the most relevant market returns are used as the benchmark.
- The return under each collaborative marketing arrangement is therefore indexed against the comparable Zespri, alternate market, or comparable market, return to suppliers.
- An index figure of **100.0** means that the net return to suppliers from the collaborative marketing arrangement was **the same as** benchmarked returns. Similarly, where the figure is less than 100, the return was less than the comparable benchmarked return. Where the figure is more than 100, the return was more than the comparable benchmarked return.

Tables 2 & 3 show:

- 1. By year, the total amount by which the collaborative marketing programmes were greater or were less than the comparative returns to suppliers (measured at OGR).
- 2. For 2022-23, the average OGR per tray (orchard gate return) for all collaborative marketing arrangements was NZ\$6.28 per tray, and the average equivalent Zespri OGR return was NZ\$5.89 per tray;
- 3. The total amount by which collaborative marketing programmes have exceeded comparative Zespri TFSP (Total Fruit and Service Payments) for the 23 years up to and including 2022-23 is NZ\$5,061,188.

2. Kiwiberry

The kiwiberry collaborative marketing programmes operate from February to Early April in each year. The below results are for February to April 2023, and appear in alphabetical order. The assessment does not include Zespri, as it did not export kiwiberry in 2023.
